WordPress Developer with 2+ years of experience delivering software development solutions to high-value clients. Proven success in managing large-scale applications, driving system efficiency, and increasing performance through skillful strategic planning, coding, and software engineering services.

PROFESSIONAL EXPERIENCE

SOFTZINO TECHNOLOGIES,
Associate Software Engineer

Uttara-11, Dhaka
August 2024–Present

- Designed and developed custom WordPress themes using PHP, HTML5, CSS3/Sass, and JavaScript (ES6+).
- Developed custom plugins tailored to client/business requirements using OOP in PHP.
- Created fully responsive, cross-browser compatible UIs with modern UX principles.
- Customized theme templates using the WordPress Template Hierarchy and Advanced Custom Fields (ACF).
- Leveraged the Customizer API and theme options for dynamic, user-friendly configuration.
- Built REST API integrations to fetch/send data from external platforms (e.g., payment gateways, CRMs).
- Created custom Gutenberg blocks using React and the WordPress Block Editor APIs.
- Ensured plugin compliance with WordPress Coding Standards and security best practices (nonces, sanitization, validation).
- Delivered scalable, maintainable code by using hooks (actions/filters) and custom post types.
- Followed mobile-first design and accessibility (WCAG) standards.
- Used Git and deployment workflows to manage updates across environments.
